ECO WASHING FLEXFIT NOTOP TENNIS HAT

Thanks to a new design this classic bucket hat shows a smart transformation: the top has been divided into six panels that are kept in shape by a circumferential band. This takes away the typical, somewhat angular shape and makes the bucket hat rounder. Furthermore, the flat brim is packed with denser than regular decorative seams that rounds off the new design. Matching it is the single-colored look with fine ablutions. The bucket hat is a one size fits all and consists of skin-pleasing cotton that has been infused with a little spandex percentage to offer an optimum fit.

VISOR

A fabric-covered round piece attached to the front of the cap.

Made to help shield the eyes from the sun, visors come in a wide range of shapes and curvatures to cater to a variety of headwear styles.

CROWN

The distance from the bottom edge of the cap to the top of the head.

This helps determine the depth of the cap. A smaller number means the cap will sit higher on the head while a larger number means the cap will sit lower.

PANELS

Triangular pieces of fabric that are stitched together.

These pieces come together to form the main rounded structure of the cap. Depending on the style, caps generally consist of 5 or 6 panels.

CLOSURE

The back piece of the cap that determines fit and adjustability.

There is a wide range of closure types such as snapbacks, buckles, and plastic hooks made to give our customers the perfect fit.

PROFILE

The slope of the cap's crown.

Low-profile caps tend to have crowns that are more angled while high profile caps have crowns that are more perpendicular to the visor.
